COMPREHENSIVE CENTER FOR PEDIATRICS

MEDICAL UNIVERSITY
OF VIENNA

Vienna Healthcare Group
University Hospital Vienna

Dear colleagues,

Securing the airway and maintaining adequate oxygenation and ventilation are essential of elective and emergency neonatal care.

Difficult airway situations in premature and newborn infants are rare, but it is all the more important to be adequately prepared for such acute emergencies. The workshop aims to provide both experienced and less-experienced neonatologists with optimal airway management skills. In addition to lectures and discussions rounds, practical training in the Simulation Center of the Comprehensive Center for Pediatrics will be provided.

Topics include airway management, including intubation of premature and newborn infants, video laryngoscopy, difficult neonatal airway management, supraglottic airway devices, and simulation-based training.

We look forward to your participation and engaging discussions,

Angelika Berger and the Neonatology Team

The workshop will be conducted in a small group setting with approximately 15 participants.

Advanced Neonatal Airway Workshop

23rd February 2024
Department of Pediatrics and
Adolescent Medicine
Medical University of Vienna/
University Hospital Vienna

Programme

9.00 – 9.30 am
Welcome and Introduction

9.30 – 10.30 am
**Effective Mask Ventilation for Premature and
Newborn Infants**

10.30 – 11.30 am
Intubation of Premature and Newborn Infants

11.30 – 11.45 am
Coffee Break and Discussion

11.45 am – 12.45 pm
Difficult Airway Management

12.45 – 1.45 pm
Lunch Break

1.45 – 3.30 pm
**Small Group Skills: Non-invasive and Invasive
Management, Simulation/Scenario Training**

3.30 – 4.00 pm
Summary, Review, and Q&A Session

Speaker
